

# Be the Disruptive Force that Changes Your Company's Healthcare Costs for the Better

## How are you prioritizing your population health efforts and strategies?

The Association for Health Risk Management and myCatalyst have partnered to empower employers to understand their population, prioritize efforts, and take charge of health plans and costs. Employers are using this innovative, powerful data tool to support decision-making and strategy development to assist C-suites and HR Directors, while providing CFOs with defensible ROI and actionable insights to improve outcomes.

**"As a member of ACHRM, we're learning about new tools and solutions to make a direct impact. With over 1,000 lives covered, my annual membership fee is a drop in the bucket compared to thousands in savings!" - ACHRM member (Florida)**

Our Innovative Data Analytics Solution will empower employers with:

- A robust Population Health platform
- Responsive Executive Data Dashboards
- Differentiation of Healthcare Pricing Data
- Separate Hard and Soft costs and benefits relative to ROI
- Market Price Comparison: to assist steering and direct contracting efforts by providing pricing differences among healthcare providers in the marketplace
- The ability to evaluate Healthcare Cost Containment Strategies: metric- or referenced-based pricing, direct contracting, bundled rates, population health management, or a combination.
- Compare/Contrast Strategies: i.e., launching an onsite clinic, joining a collaborative employer (near-site) clinic, or entering into an agreement with a local DPC
- Cost/Benefit Analysis of Domestic or International Medical Travel
- Tools to analyze integrating safety/workers' compensation efforts with wellness/prevention strategies
- Capabilities to determine Most Effective Self-Insurance Strategy: ex. major carrier vs. independent TPA, including decoupling the PBM
- Information to identify Higher Value Providers (price as a function of quality)
- Documented Savings & Improved Outcomes
